INTERVIEW SUMMARY

Mail Stop AF
Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Sir:

Applicants thank the Examiner for participating in an interview with Applicants' attorney on August 20, 2009 concerning the above-identified application.

During the interview, the discussion centered on a proposed amendment to claim 9 at line 4, which changed "a first transparent conductive layer disposed over said first surface of said bottom substrate" to "a first transparent conductive layer disposed on said first surface of said bottom substrate". The Examiner contended that the changed language still reads on the Oh patent. The Examiner suggested that the Oh patent would be overcome if "over" were

changed to "directly on". The Examiner also noted that he believed he could find a reference that supplies the deficiency of the Oh patent.

Also during the interview, the Examiner clarified that the underlined phrase in paragraph (d) at page 6 of the final Office Action should read "where a ion beam and a ion beam use the same ion source".

Respectfully Submitted,

Date: 9/21/09
